**Euro 5/6 PassThru**

PTS 100 as a comfort solution

# PassThru as plug-and-play solution by Bosch

Since 2009, the Euro 5/6 Standard requires that vehicle manufacturers make all technical repair information available to workshops via their online portals. In addition, reprogramming of control units must be supported. Vehicle manufacturers have to provide data for diagnostics, service, repair and maintenance.

The new KTS generation by Bosch is equipped with a PassThru interface that makes it possible to use the Internet portals of the vehicle manufacturer for these functions including reprogramming according to Euro 5/6. Workshops can thus update the software of control units at any time.

As early as 2009, Bosch provided with the KTS 540/570 communication modules that can still be used, with certain restrictions, for Euro 5/6.

Using this know-how, Bosch offers a complete comfort solution with preinstalled portal software – the PassThruSolution 100 (PTS 100) that will make your daily workshop routines easier.

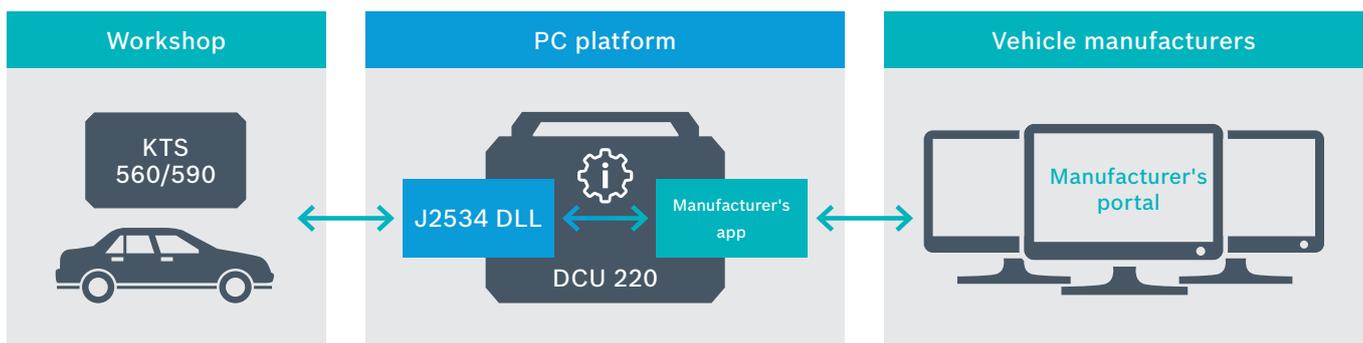

Based on DCU 220, KTS 560/590 and supplementary services, Bosch already offers you the solution today for the demands of tomorrow.

With the installation service, Bosch takes care of the time-consuming registrations and installations of the OEM applications of Audi, BMW, Mercedes-Benz and Volkswagen for you. This offer is supplemented by a basic service that assists you in all questions concerning PassThru and its application. If necessary, an expert will even support you with the vehicle reprogramming.

PTS 100 offers, together with ESI[tronic] 2.0, a professional solution for your workshop for effecting multi-model diagnostics and using the manufacturer's portal.

For more information relating to Euro 5/6 PassThru

KTS 560/590 can today be used with Euro 5/6 PassThru for the following vehicle manufacturers: Audi, BMW, Citroën, Ford, Land Rover, Mercedes-Benz, Opel, Peugeot, Renault, Seat, Škoda, Toyota, Volkswagen and Volvo.

Using the Bosch comfort solution PTS 100 ensures you an easy start with Euro 5/6 PassThru and promises to be a profitable investment in the future.
